7203SR *	90~264VAC Universal VAC	1.2 Amp CC	Cdn\$93	Stock

2009.09.04

The first two digits of the model number indicate the nominal battery voltage the charger is designed to charge, except for the 604CC, which is a 6-volt nominal charger.

Model numbers which show the 'ACI' prefix are Advanced Chargers brand, also made by Soneil. Due to the lifetime warranty and extra connector set that come with these chargers, Econogics feels these present a better value to our customers than the Soneil-branded version. The ACI models come with the same charging algorithm and internals as the Soneils. If you need a replacement for a Soneil charger where we carry the ACI model, they are completely compatible replacements from the same manufacturer.

Soneil is a dynamic company, continually adding to their product line in response to customer demand. If you are looking for a Soneil or ACI product that is not on our price list, please [contact us](#) for pricing.

* denotes charger not suitable for use in series or parallel connections for charging as described in [Soneil Series and Parallel Charging Note](#) on the subject. (Last we checked, the September 4, 2009 update version of this document is not yet on the Soneil Web site.)

Prices and specifications are subject to change by Soneil without notice.

Taxes, shipping, special handling are extra.

Bulk discounts available on orders of 12 or more units of the same model in same shipment.
